

ORBIT SWITCH

SMARTER ENERGY SOLUTIONS

FOR YOUR BUSINESS

Slash Energy Costs and
Decarbonise for a Sustainable
Future

At Orbit Switch, we specialise in delivering smarter energy solutions that cut your energy costs—and reduce your carbon footprint—for good. Rising energy prices don't just impact your margins; they threaten your business's long-term sustainability. But energy costs are only part of the problem. Businesses today also face increasing pressure to reduce their carbon emissions.

Our strategic, end-to-end approach not only lowers your energy bills but also helps you decarbonise, positioning your business as a leader in sustainability.

Why ORBIT SWITCH

As a business owner or executive, managing energy costs and emissions may not be at the top of your priority list, but the financial and reputational risks are real. Orbit Switch offers a clear, structured path to both cost savings and decarbonisation.

We take the stress out of energy management, delivering measurable results that not only benefit your bottom line but also contribute to a greener future.

From strategy development to execution, we manage the entire energy and carbon reduction process for you. Our experts handle every detail, ensuring long-term financial savings while helping you meet environmental targets. With Orbit Switch, you don't just cut costs—you reduce your carbon footprint too.

Here's Why You Need Orbit Switch—Right Now

Instant Savings:

Orbit Switch has helped businesses reduce energy costs by up to 90%. Imagine what that could do for your bottom line and carbon emissions.

Decarbonisation Strategies:

We integrate solutions like renewable energy, energy efficiency, and emissions reduction into a seamless plan that lowers both costs and carbon output.

Long-Term Impact:

Our strategies are designed to ensure your business is insulated from rising energy prices while decarbonising for a more sustainable future. No more reactive decisions—get a proactive plan.

Trusted Experts:

Gain access to our network of top-tier energy and sustainability professionals, each vetted for their expertise, reliability, and proven results.

End-to-End Service:

From initial consultation to full implementation, we handle everything, so you can focus on your core business.

Our Promise:

Hassle-Free,
Sustainable
Savings

The **ORBIT** SWITCH Advantage

Unmatched Energy & Decarbonisation Solutions

With more than 30 years of experience advising businesses—including 15 years in the energy sector—we've identified five critical barriers preventing companies from reducing their energy costs and carbon emissions. Here's how we help you overcome them:

1. Lack of Reliable Information:

Businesses struggle to find clear, reliable guidance on reducing energy costs and decarbonising. Orbit Switch is your single source of truth. Our expert team provides the answers and solutions you need—no more guesswork.

2. Lack of Trust in Providers:

Sales-driven firms often overpromise and under deliver, especially when it comes to sustainability claims. Orbit Switch is different. We base our recommendations on thorough analysis, combining energy savings with decarbonisation strategies, ensuring we deliver on our promises.

3. Lack of Time to Focus on Energy Management:

We know that as a business owner or executive, your time is valuable. Energy management and decarbonisation might not be a top priority but delaying action risks both higher costs and reputational damage. That's why we handle everything, from research to execution—so you can focus on what you do best.

4. Getting the Wrong Solution:

Many companies offer short-term, single product fixes like solar installations. While beneficial, solar alone won't address the broader need for energy efficiency and carbon reduction. Orbit Switch offers a multi-pronged approach that delivers sustainable, long-term results across the board.

5. Access to Funding:

Energy efficiency and decarbonisation projects often require upfront capital. Orbit Switch helps you access grants, financing, and performance-based funding to make these projects more affordable. We eliminate financial barriers, enabling you to move forward with the energy and sustainability solutions your business needs.

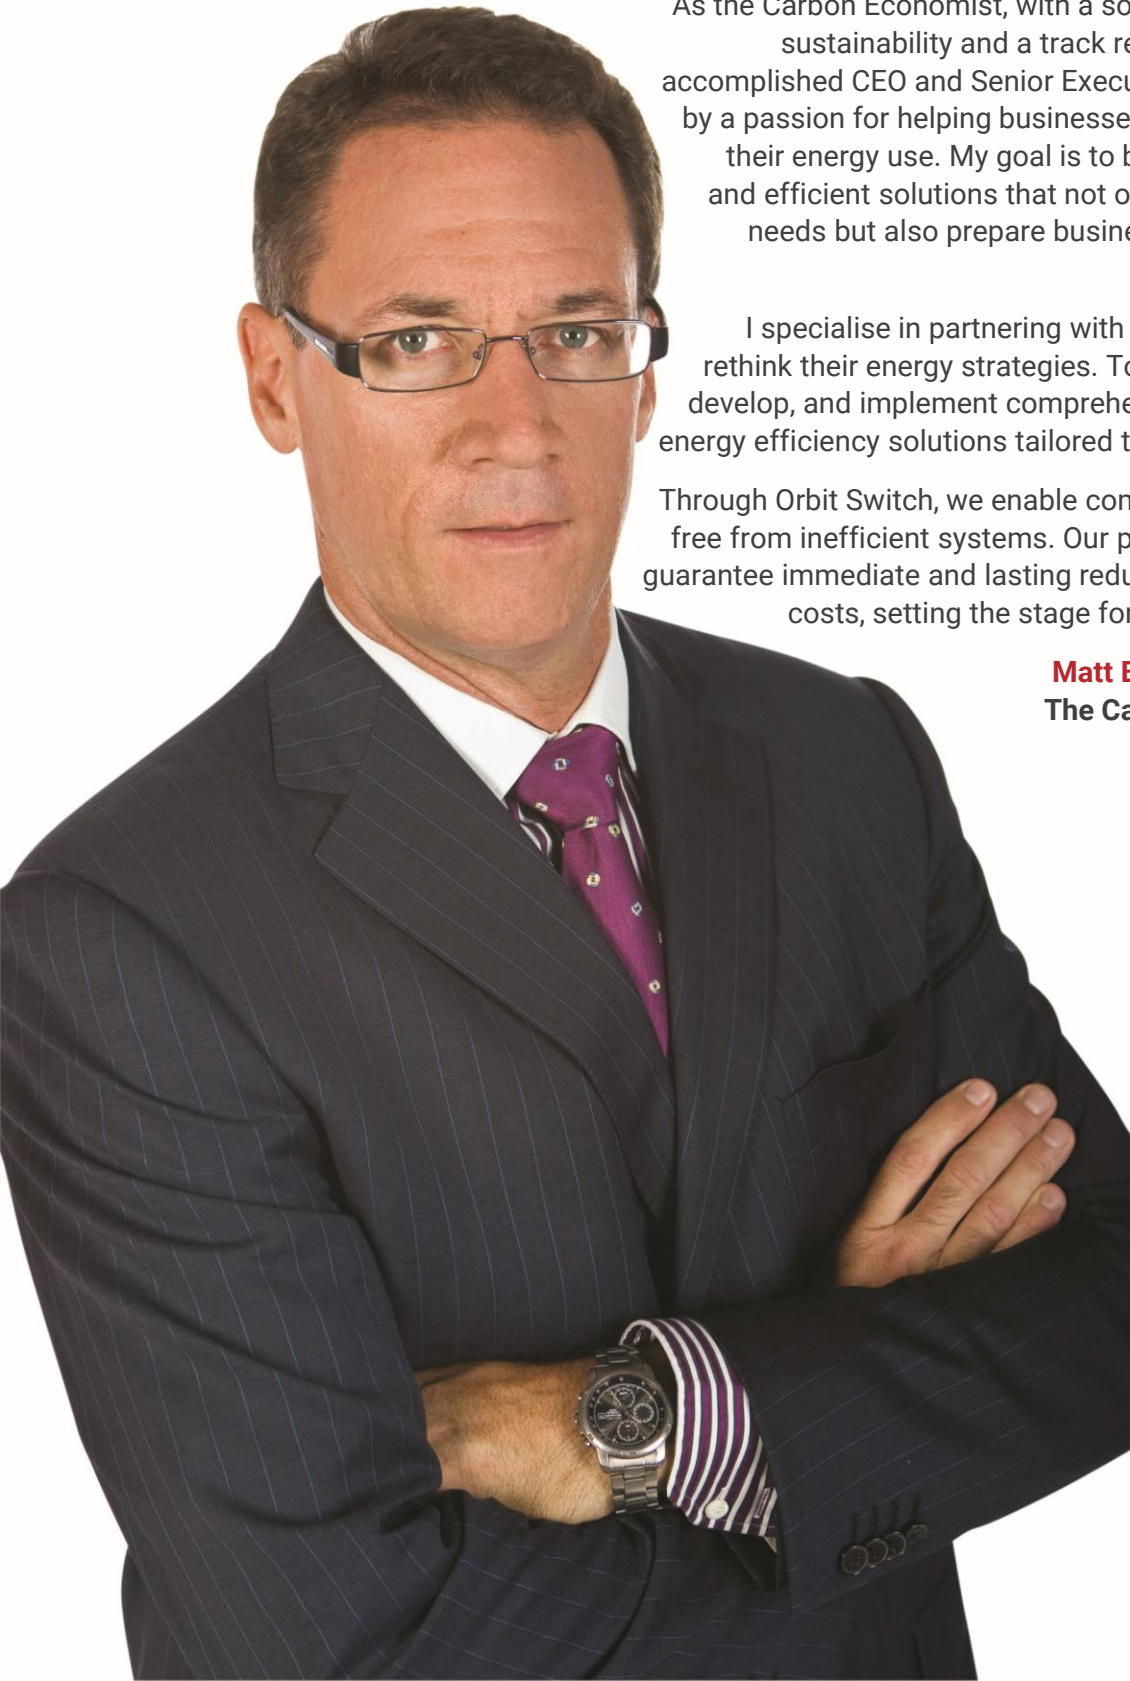

About Matt Brannelly

As the Carbon Economist, with a solid foundation in sustainability and a track record as a highly accomplished CEO and Senior Executive, I am driven by a passion for helping businesses take control of their energy use. My goal is to build sustainable and efficient solutions that not only meet today's needs but also prepare businesses for a more resilient future.

I specialise in partnering with organisations to rethink their energy strategies. Together, we plan, develop, and implement comprehensive, long-term energy efficiency solutions tailored to your business.

Through Orbit Switch, we enable companies to break free from inefficient systems. Our proven strategies guarantee immediate and lasting reductions in energy costs, setting the stage for future success.

The Carbon Economist

Long-Term Energy and Carbon Savings Requires a Holistic Approach

Lowering your energy costs isn't about choosing one solution over another. It's about developing a comprehensive strategy that addresses both your energy consumption and carbon emissions. At Orbit Switch, we empower businesses to reduce their reliance on the grid, lower carbon emissions, and implement long-term solutions that deliver significant savings.

We've already helped some of Australia's leading businesses achieve these results, including:

Dyvest Health Care
One Stop Family Care

How ORBIT SWITCH Works For You

STEP 1

Reach Out to Orbit Switch

It all starts with a conversation. Contact us via phone or email to book your initial consultation.

STEP 2

We Assess Your Energy Strategy and Carbon Footprint

We'll meet with you to discuss your business's current energy use, carbon emissions, and future goals. From there, we identify opportunities for savings and decarbonisation.

STEP 3

Receive Your Energy & Emissions Performance Efficiency Report

This custom report outlines the steps needed to slash energy costs and carbon emissions. Our recommendations leverage our network of pre-vetted experts and cutting-edge technologies to deliver optimal results.

STEP 4

Implement Your Plan

When you're ready, we'll manage the implementation of your tailored strategy. From installation to monitoring, we take care of the entire process, ensuring you see both immediate savings and long-term carbon reduction.

How ORBIT SWITCH Works For You

Our comprehensive approach provides a solution that works for your unique business needs—not just a temporary fix. Here's what you can expect from a partnership with Orbit Switch:

- **Accurate Savings and Emissions Reductions Projections:**

Using industry-leading software, we calculate both your financial savings and emissions reduction potential with precision, ensuring the outcomes we promise match the results you see.

- **Real-Time Monitoring for Complete Control:**

Our cloud-based Virtual Energy Manager allows you to track your energy performance and carbon reductions in real time. Remember, what you can measure, you can manage.

- **Access to a Network of Energy and Sustainability Experts:**

We've curated a network of top-tier energy technology providers and sustainability experts. When you partner with Orbit Switch, you gain direct access to these industry leaders.

- **Peace of Mind:**

Every expert we work with is fully accredited and brings years of proven experience. You're in good hands with Orbit Switch.

Future-Proof Your Business With

ORBIT SWITCH

Future-proof your business with smarter, greener energy solutions today.

Don't let rising energy costs or carbon regulations erode your profits. A partnership with Orbit Switch gives you the tools to protect your bottom line while achieving long-term, sustainable energy savings and decarbonisation.

Start saving and decarbonising now. Contact Orbit Switch and unlock immediate financial savings while making a positive impact on the environment.
